

All about IRAs

An individual retirement arrangement (IRA) is a personal retirement savings plan that offers specific tax benefits. In fact, IRAs are one of the most powerful retirement savings tools available to you. Even if you're contributing to a 401(k) or other plan at work, you should also consider investing in an IRA.

What types of IRAs are available?

There are two major types of IRAs: traditional IRAs and Roth IRAs. Both allow you to make annual contributions of up to \$4,000 in 2005 through 2007 (the annual IRA contribution limit increases to \$5,000 in 2008). Generally, you must have at least as much taxable compensation as the amount of your IRA contribution. But if you are married filing jointly, your spouse can also contribute to an IRA, even if he or she does not have taxable compensation. The law also allows taxpayers age 50 and older to

make additional "catch-up" contributions. These folks can put \$4,500 into their IRAs for 2005, and up to \$5,000 in 2006 and 2007 (increasing to \$6,000 per year in 2008).

Both traditional and Roth IRAs feature tax-sheltered growth of earnings. And both give you a wide range of investment choices. However, there are important differences between these two types of IRAs. You must understand these differences before you can choose the type of IRA that's best for you.

Traditional IRAs

Practically anyone can open and contribute to a traditional IRA. The only requirements are that you must have taxable compensation and be under age 70½. You can contribute the maximum allowed each year as long as your taxable compensation for the year is at least that amount. If your taxable compensation for the year is below the maximum contribution allowed, you can contribute only up to the amount you earned.

Tax Year 2005 Individuals Covered by an Employer Plan

Filing status	Deduction is limited if MAGI between:	No deduction if MAGI over:
Single	\$50,000 - \$60,000	\$60,000
Married joint*	\$70,000 - \$80,000	\$80,000
Married separate	\$0 - \$10,000	\$10,000

* If you're not covered by an employer plan, but your spouse is, your deduction is limited if your MAGI is \$150,000 to \$160,000, and eliminated if your MAGI exceeds \$160,000.

Your contributions to a traditional IRA may be tax deductible on your federal income tax return. This is important because tax-deductible (pretax) contributions lower your taxable income for the year, saving you money in taxes. If neither you nor your spouse is covered by a 401(k) or other employer-sponsored plan, you can generally deduct the full amount of your annual contribution. If one of you is covered by such a plan, your ability to deduct your contributions depends on your annual income (modified adjusted gross income, or MAGI) and your income tax filing status. You may qualify for a full deduction, a partial deduction, or no deduction at all.

What happens when you start taking money from your traditional IRA? Any portion of a distribution that represents deductible contributions is subject to income tax because those contributions were not taxed when you made them. Any portion that represents investment earnings is also subject to income tax because those earnings were not previously taxed either. Only the portion that represents nondeductible, after-tax contributions (if any) is not subject to income tax. In addition to income tax, you may have to pay a 10% early withdrawal penalty if you're under age 59½, unless you meet one of the exceptions.

If you wish to defer taxes, you can leave your funds in the traditional IRA, but only until April 1 of the year following the year you reach age 70½. That's when you have to take your first required minimum distribution from the IRA. After that, you must take a distribution by the end of every calendar year until your funds are exhausted or you die. The annual distribution amounts are based on a standard life expectancy table. You

can always withdraw more than you're required to in any year. However, if you withdraw less, you'll be hit with a 50% penalty on the difference between the required minimum and the amount you actually withdrew.

Roth IRAs

Not everyone can set up a Roth IRA. Even if you can, you may not qualify to take full advantage of it. The first requirement is that you must have taxable compensation. If your taxable compensation for the year is at least \$4,000 (for 2005 through 2007), you may be able to contribute the full \$4,000. But it gets more complicated. Your ability to contribute to a Roth IRA in any year depends on your MAGI and your income tax filing status. Your allowable contribution may be less than the maximum possible, or nothing at all.

Filing status	Contribution is limited if MAGI between:	No contribution if MAGI over:
Single	\$95,000 - \$110,000	\$110,000
Married joint	\$150,000 - \$160,000	\$160,000
Married separate	\$0 - \$10,000	\$10,000

Your contributions to a Roth IRA are not tax deductible. You can invest only after-tax dollars in a Roth IRA. The good news is that those contribution amounts may be income tax free when you withdraw them. Better yet, if you meet certain conditions, the earnings portion of any withdrawal from a Roth IRA will be completely income tax free, too. To be eligible for these qualifying distributions, you must meet a five-year holding period requirement. In addition, one of the following must apply:

- You have reached age 59½ by the time of the withdrawal
- The withdrawal is made because of disability
- The withdrawal (of up to \$10,000) is made to pay first-time homebuyer expenses
- The withdrawal is made by your beneficiary or estate after your death

Qualifying distributions will also avoid the 10% early with-

drawal penalty. This ability to withdraw your funds with no taxes or penalty is a key strength of the Roth IRA. And remember, even nonqualifying distributions will be taxed (and possibly penalized) only on the investment earnings portion of the distribution, and then only to the extent that your distribution exceeds the total amount of all contributions that you have made.

Another advantage of the Roth IRA is that there are no required distributions after age 70½ or at any time during your life. You can put off taking distributions until you really need the income. Or, you can leave the entire balance to your beneficiary without ever taking a single distribution. Also, as long as you have taxable compensation and qualify, you can keep contributing to a Roth IRA after age 70½.

Choose the right IRA for you

Assuming you qualify to use both, which type of IRA is best for you? Sometimes the choice is easy. The Roth IRA will probably be a more effective tool if you don't qualify for tax-deductible contributions to a traditional IRA. However, if you can deduct your traditional IRA contributions, the choice is more difficult. Most professionals believe that a Roth IRA will still give you more bang for your dollars in the long run, but it depends on your personal goals and circumstances. The Roth IRA may very well make more sense if you want to minimize taxes during retirement and preserve assets for your beneficiaries. But a traditional deductible IRA may be a better tool if you want to lower your yearly tax bill while you're still working (and probably in a higher tax bracket than you'll be in after you retire). A financial professional or tax advisor can help you pick the right type of IRA for you.

Note: You can have both a traditional IRA and a Roth IRA, but your total annual contribution to all of the IRAs that you own cannot be more than \$4,000 for 2005 through 2007 (\$4,500 in 2005, \$5,000 in 2006 and 2007, if age 50 or older).
